- (1) Adjusted fully distributed pro forma net income and adjusted EBITDA are non-GAAP measures. A reconciliation of GAAP net income to each of these measures is included in the accompanying financial data. See also “Non-GAAP Financial Measures,” included herein.

“We are pleased with our second quarter results, which included a return to positive same store sales growth. We believe our results reflect progress on our key initiatives laid out earlier this year around convenience, quality and innovation,” said Russ Bendel, President and Chief Executive Officer of The Habit. “During the quarter, we opened seven new company-operated Habit Burger Grills of which three were drive-thrus. Our franchisee partners also opened two new restaurants, one in Seattle and a second location in China. This keeps us on track to open approximately 30 new company-operated locations in 2018, including approximately 15 drive-thrus, and seven to nine franchise locations.”

Second Quarter 2018 Financial Results Compared to Second Quarter 2017

Total revenue was \$102.9 million in the second quarter of 2018, compared to \$83.3 million in the second quarter of 2017.

Company-operated comparable restaurant sales increased 1.2% for the quarter ended June 26, 2018. The increase in company-operated comparable restaurant sales was driven primarily by a 4.5% increase in average transaction amount partially offset by a 3.3% decrease in transactions.

Net income for the second quarter of 2018 was \$2.1 million, or \$0.10 per diluted weighted average share, compared to \$1.1 million, or \$0.05 per diluted weighted average share in the second quarter of 2017.

Adjusted fully distributed pro forma net income in the second quarter of 2018 was \$2.2 million, or \$0.08 per fully distributed weighted average share, compared to \$1.7 million, or \$0.06 per fully distributed weighted average share, in the second quarter of 2017. A reconciliation between GAAP net income and adjusted fully distributed pro forma net income is included in the accompanying financial data.

2018 Outlook

The Company currently anticipates the following for its fiscal year 2018:

- Total revenue between \$393 million to \$396 million;
- Company-operated comparable restaurant sales growth of 0.5% to 1.0%;
- The opening of approximately 30 company-operated restaurants and seven to nine franchised/licensed restaurants;
- Restaurant contribution margin of 16.5% to 17.0%;
- General and administrative expenses of \$37.75 million to \$38.25 million;
- Depreciation and amortization expense of approximately \$24.4 million;
- Capital expenditures of \$43.0 million to \$46.0 million; and
- An effective pro forma tax rate of approximately 31.5% to 32.5%, which assumes the conversion of all common units of The Habit Restaurants, LLC for shares of the Company's Class A common stock (and cancellation of corresponding shares of Class B common stock), which would eliminate the non-controlling interests.

The following definitions apply to these terms as used in this release:

Comparable restaurant sales reflect the change in year-over-year sales in our comparable restaurant base. A restaurant enters our comparable restaurant base in the accounting period following its 18th full period of operations. We operate on a 4-4-5 calendar, each accounting period will consist of either four or five weeks with the exception of a 53-week year, where the last period contains six weeks.

Average Unit Volumes (AUVs) are calculated by dividing revenue for the trailing 52-week period for all company-operated restaurants that have operated for 12 full accounting periods by the total number of restaurants open for such period.

Adjusted fully distributed pro forma net income includes net income attributable to The Habit (i) excluding income tax expense, (ii) excluding the effect of non-recurring items, (iii) assuming the exchange of all common units of The Habit Restaurants, LLC into shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock), which results in the elimination of non-controlling interests in The Habit Restaurants, LLC, and (iv) reflecting an adjustment for income tax expense on fully distributed pro forma net income before income taxes at our estimated long term effective income tax rate. Adjusted fully distributed pro forma net income is a non-GAAP financial measure because it represents net income attributable to The Habit, before non-recurring items and the effects of non-controlling interests in The Habit Restaurants, LLC. We use adjusted fully distributed pro forma net income to facilitate a comparison of our operating performance on a consistent basis from period to period that, when viewed in combination with our results prepared in accordance with GAAP, provides a more complete understanding of factors and trends affecting our business than GAAP measures alone and eliminates the variability of non-controlling interests as a result of member owner exchanges of common units of The Habit Restaurants, LLC into shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock).

Adjusted fully distributed pro forma net income per fully distributed weighted average share is calculated using adjusted fully distributed pro forma net income as defined above and assumes the exchange of all common units of The Habit Restaurants, LLC into shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock).

EBITDA, a non-GAAP measure, represents net income before interest expense, net, provision for income taxes, and depreciation and amortization.

Adjusted EBITDA, a non-GAAP measure, represents EBITDA plus pre-opening costs, stock-based compensation, loss on disposal of assets, Tax Receivable Agreement liability adjustment, and other non-recurring items.

The non-GAAP measures used in this press release may be different from the measures used by other companies.
