“We are pleased with our results for the first quarter, particularly in light of a challenging operating environment and record rainfall in our core California market,” said Russ Bendel, President and Chief Executive Officer of The Habit Restaurants, Inc. “Our results included total revenue growth of over 17% as well as our 53<sup>rd</sup> consecutive quarter of positive comparable restaurant sales. Our comparable restaurant sales growth in the quarter was driven by new product innovation – such as our Golden Chicken Salad – as well as a focus on digital marketing campaigns around new and existing products. We opened three new company-operated Habit Burger Grills during the first quarter, all in the California market. In addition, our franchise partners opened three franchise locations, two in Washington and one in Las Vegas.”

Company-operated comparable restaurant sales increased 0.9% for the quarter ended March 28, 2017. The increase in company-operated comparable restaurant sales was driven primarily by a 1.5% increase in average transaction amount partially offset by a 0.6% decrease in transactions.

## 2017 Outlook

The Company currently anticipates the following for its fiscal year 2017:

- Total revenue between \$338 million to \$342 million;
- Company-operated comparable restaurant sales growth of approximately 2.0%;
- The opening of 31 to 33 company-operated restaurants and five to seven franchised/licensed restaurants;
- Restaurant contribution margin of approximately 20.0%;
- General and administrative expenses of \$33.5 million to \$34.0 million;
- Depreciation and amortization expense slightly under \$19.0 million;
- Capital expenditures of \$44.0 million to \$47.0 million; and
- An effective pro forma tax rate of approximately 41.5%, which assumes the conversion of all common units of The Habit Restaurants, LLC for shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock), which would eliminate the non-controlling interests.

## The following definitions apply to these terms as used in this release:

**Comparable restaurant sales** reflect the change in year-over-year sales in our comparable restaurant base. A restaurant enters our comparable restaurant base in the accounting period following its 18th full period of operations. We operate on a 4-4-5 calendar, each accounting period will consist of either four or five weeks with the exception of a 53-week year, where the last period contains six weeks.

**Average Unit Volumes (AUVs)** are calculated by dividing revenue for the trailing 52-week period for all company-operated restaurants that have operated for 12 full accounting periods by the total number of restaurants open for such period.

**Adjusted fully distributed pro forma net income** includes net income attributable to The Habit (i) excluding income tax expense, (ii) excluding the effect of non-recurring items, (iii) assuming the exchange of all common units of The Habit Restaurants, LLC into shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock), which results in the elimination of non-controlling interests in The Habit Restaurants, LLC, and (iv) reflecting an adjustment for income tax expense on fully distributed pro forma net income before income taxes at our estimated long term effective income tax rate. Adjusted fully distributed pro forma net income is a non-GAAP financial measure because it represents net income attributable to The Habit, before non-recurring items and the effects of non-controlling interests in The Habit Restaurants, LLC. We use adjusted fully distributed pro forma net income to facilitate a comparison of our operating performance on a consistent basis from period to period that, when viewed in combination with our results prepared in accordance with GAAP, provides a more complete understanding of factors and trends affecting our business than GAAP measures alone and eliminates the variability of non-controlling interests as a result of member owner exchanges of common units of The Habit Restaurants, LLC into shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock).

**Adjusted fully distributed pro forma net income per fully distributed weighted average share** is calculated using adjusted fully distributed pro forma net income as defined above and assumes the exchange of all common units of The Habit Restaurants, LLC into shares of our Class A common stock (and cancellation of corresponding shares of our Class B common stock).

**EBITDA**, a non-GAAP measure, represents net income before interest expense, net, provision for income taxes, and depreciation and amortization.

---

**Adjusted EBITDA**, a non-GAAP measure, represents EBITDA plus pre-opening costs, stock-based compensation, loss on disposal of assets, and exchange related expenses.

**Non-GAAP Financial Measures**

To supplement our consolidated financial statements, which are prepared and presented in accordance with GAAP, we use non-GAAP financial measures, including those discussed above. These measures are not intended to be considered in isolation or as substitutes for, or superior to, financial measures prepared and presented in accordance with GAAP. We believe that they provide useful information about operating results, enhance understanding of past performance and future prospects, and allow for greater transparency with respect to key metrics used by management in its financial and operational decision making. However, when analyzing the Company's operating performance, investors should not consider adjusted earnings per fully distributed weighted average share or adjusted fully distributed pro forma net income in isolation or as substitutes for net income (loss), cash flows from operating activities or other operation statement or cash flow statement data prepared in accordance with U.S. GAAP. The non-GAAP measures used in this press release may be different from the measures used by other companies.
